| <i>Karetnikov V. G.</i> | |
| Foreword | 2 |
| Contents | 3 |
| International conference "VARIABLE STARS – 2005" | |
| <i>Abdel-Sabour M.A.</i> | |
| Stability of Pulsational Amplitude for Cepheids of Period = 6 ± 1^d | 5 |
| <i>Bazyey O.A., Sibiryakova E.S., Shulga A.V.</i> | |
| The method for fast determination of Geostationary Earth Satellite orbit from angular coordinates measurements | 8 |
| <i>Bazyey O.A., Kara I.V.</i> | |
| Integration of differential equation for celestial bodies' motion by the Runge-Kutt method in the third order | 14 |
| <i>Baranovsky E., Rosenbush A.</i> | |
| The modeling of the chromosphere of the R CrB star | 17 |
| <i>Bezdenezhnyi V.P.</i> | |
| Histograms of periods distribution and mode identifications of RRc Lyr stars | 19 |
| <i>Bezdenezhnyi V.P.</i> | |
| On the periods of RV Tau stars | 21 |
| <i>Berdnikov L.N.</i> | |
| New catalog of distances and light curve parameters of classical Cepheids | 23 |
| <i>Berdnikov L.N., Efremov Yu.N., Glushkova E.V., Turner D.G.</i> | |
| Groupings of population I objects in the Galaxy | 26 |
| <i>Berdnikov L.N., Glushkova E.V., Turner D.G.</i> | |
| Period changes in Cepheids belonging to open clusters and associations | 29 |
| <i>Бурнашев В.И., Бурнашева Б.А.</i> | |
| ПЗС-фотометрия звезд типа RV TAU | 31 |
| <i>Butkovskaya V.V.</i> | |
| Spectropolarimetry of β Cephei type star γ Pegasi | 34 |
| <i>Bychkov V.D., Bychkova L.V., Madej J.</i> | |
| New period of the longitudinal magnetic field variability in Ap star γ Equ | 37 |
| <i>Bychkov V.D., Bychkova L.V., Madej J.</i> | |
| Magnetic field variability of stars | 39 |
| <i>Dorokhova T.N., Dorokhov N.I.</i> | |
| roAp stars as objects for asteroseismology | 41 |
| <i>Dzyubenko M.V.</i> | |
| Some peculiarities of the radial gas distribution in Galactic disc | 49 |
| <i>Fokin A., Mathias Ph., Chapellier E., Gillet D., Nardetto N.</i> | |
| Hydrodynamic model for a β Cephei variable BW Vulpeculae | 52 |
| <i>Gorbaneva T.I.</i> | |
| Enrichment of the Galactic disk by the neutron capture elements (Ba and Eu) | 57 |
| <u>Kalv P.</u> , <i>Harvig V., Aas T., Pustyl'nik I.</i> | |
| On the nature of asymmetry of the light curves of BM Cas – a long period eclipsing supergiant binary | 61 |
| <i>Klabukova A.V.</i> | |
| New eclipsing binary in Orion | 65 |
| <i>Klabukova A.V.</i> | |
| About three cataclysmic variable stars | 67 |

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <i>Kosinsky A.S., Tamello V.G., Kushmar I.J., Bryukhanov I.S., Semenyuta A.S., Balyuk I.I.</i> The investigation of the classical Cepheid RT Aur period | 68 |
| <i>Kovtyukh V.V.</i> High precision effective temperatures of F-K supergiants and classical Cepheids | 70 |
| <i>Lovkaya M.N., Zhilyaev B.E.</i> Colorimetry of two flares on EV Lacertae from UBVR observations in 2004 | 74 |
| <i>Mishenina T.V., Gorbaneva T.I., Soubiran C., Bienayme O., Kovtyukh V.V., Korotin S.A.</i> The behavior of α -elements abundances in the thin and thick disks of the Galaxy | 78 |
| <i>Panko E., Flin P.</i> On the mean density of Galaxies and identification of structures | 81 |
| <i>Plachinda S.I.</i> Stars with Vigorous convection envelopes and results on general magnetic field observations | 84 |
| <i>Rohanidazegan M., Turner D.G., Pastukhova E.N., Berdnikov L.N.</i> The origin of brightness variations in BC Cygni | 87 |
| <i>Rudnitskij G.M.</i> Monitoring of spectral variations of Mira-type and semiregular variable stars | 90 |
| <i>Shahrukhanov O.Sh.</i> The CCD camera without cooling | 95 |
| <i>Shatsova R.B., Anisimova G.B.</i> The fluctuations in the IRAS distribution | 97 |
| <i>Sirotkin F.V., Karetnikov V.G.</i> The protoplanetary system formation as a result of the merging of close binary star consisting of the low mass pre-MS stars | 101 |
| <i>Solonovich A.P., Bryukhanov I.S.</i> The determination of periods and the definition of variability type of new variable star IRAS 17583+5150 | 108 |
| <i>Szabados L.</i> The quest for discovering extragalactic Cepheids | 111 |
| <i>Turner D.G.</i> Is Polaris leaving the Cepheid instability strip? | 115 |
| <i>Turner D.G.</i> The nature of the type C semi-regular variables | 119 |
| <i>Udovichenko S.N.</i> On the photometry of CC Andromedae | 123 |
| <i>Usenko I.A.</i> Periods of small-amplitude Cepheid Y Oph | 127 |
| <i>Usenko I.A., Miroshnichenko A.S., Klochkova V.G., Panchuk V.E.</i> Polaris, small-amplitude Cepheid with unique physical peculiarities | 130 |
| <i>Valyavin G., Bagnulo S., Fabrika S., Reisenegger A., Wade G.A., Han I., Monin D.</i> Magnetism of white dwarfs (intermediate results of a survey for kilogauss magnetic fields in white dwarfs) | 135 |
| <i>Volyanska M.Yu., Karetnikov V.G., Mandel O.E.</i> On the life and scientific activity of Professor A. Ya. Orlov (125-th anniversary of birthday) | 138 |
| <i>Zacs L.</i> The cool Galactic R Coronae Borealis variable DY Persei | 143 |
| <i>Zacs L., Alksnis O.</i> The spectroscopy of the pulsating carbon star R Lep | 144 |
